Profile

An IT professional who loves building things, from web apps to automations, and making full use of AI while doing it. I currently work as an analyst / tester on the international ENTSO-E Transparency Platform project at Unicorn. AI is my main interest: I follow where it's heading and use it for coding, debugging and learning new technologies. I have a background in IT support (L1 helpdesk, Active Directory, remote administration) and I'm looking for a role that brings together tech, development and AI.

Experience

Analyst / Tester

Unicorn · ENTSO-E Transparency Platform project · Hradec Králové (hybrid)
July 2026 – present

- Writing test cases for data extensions of the platform.
- Testing on the DEV environment and verifying features against the specification.
- Working in Jira: managing and tracking tickets, documenting the process.
- Reviewing scenarios together with senior testers and the project lead.

ICT Technician L1

BEDNAR FMT s.r.o. · Rychnov nad Kněžnou
April 2026 – June 2026

- First-level user support: taking, resolving and closing incidents in JIRA.
- Diagnosing and fixing hardware faults, replacing components (RAM, SSD, peripherals).
- Preparing and configuring new Windows workstations, joining them to the domain via Active Directory.
- Remote administration and troubleshooting over RDP / TeamViewer.
- Tracking and maintaining IT equipment, managing the hardware stock.

Customer Care Specialist

T-Mobile Czech Republic a.s. · Hradec Králové
December 2025 – February 2026

- Phone support for customers, handling technical and contract requests.
- Working with telecom devices, rate plans and internal CRM systems.
- Proactively offering products and services, meeting sales targets.

Internship – 3D graphics

Erasmus+, Germany
2024

- Creating 3D models and simple animations in Blender.
- Working with textures, lighting and exporting models for digital design.

Part-time crew member

McDonald's · Hradec Králové

June 2020 – January 2024

- Serving customers and preparing orders in a fast-paced environment.
- Teamwork, reliability and flexibility on shifts alongside my studies.

Personal projects

Nexus Grind (2026)

github.com/ErikKarasek/nexus-grind-releases | More about it: erikkarasek.cz/nexus-grind

- Cross-platform productivity tracker (tasks, habits, projects, sleep/wellness) with a gamified companion tree and an AI Coach.
- Desktop (React + Vite + Tauri) and mobile (React Native / Expo), shared domain logic with unit tests, CS/EN localisation.
- Local-first with optional cloud sync via Supabase; pnpm monorepo, CI/CD builds the Windows installer, macOS app and Android APK.

LoIStats (2026)

lolstats.erikkarasek2005.workers.dev | More about it: erikkarasek.cz/lol-stats

- Personal web app for League of Legends stats: match history, champion performance, win rate, KDA, tier list.
- Deployed on Cloudflare Workers, all data processed client-side.
- Riot Games API integration (Match v5, Summoner v4, League v4, Account v1, Data Dragon).

Monster-Watch (2026)

monster-watch.onrender.com | More about it: erikkarasek.cz/monster-watch

- Web app that tracks energy drink availability in stores across the Czech Republic.
- Automated price tracking and comparison of the cheapest options.
- React Native (Expo) app, Python (Flask) backend, web scraper, JSON API.
- Built with AI tools (Claude, Gemini CLI): coding, debugging, optimisation.

Job Tracker (2026)

job-tracker-10s.pages.dev | More about it: erikkarasek.cz/job-tracker

- Kanban tool for tracking job applications: a card per role, moving wishlist → applied → interview → offer/rejected.
- Stats built on the history of stage changes: a funnel by stage, a per-day timeline and a watch on applications with no activity.
- Three AI agents on Cloudflare Workers AI (tool calling): a posting link becomes a card with a fit score and a cover letter, a résumé reordered for that role (checked against the real one so nothing is invented), and a pre-interview brief on the company with likely questions.
- A scout on a cron trigger: every morning it reads the IT fields on Jobs.cz, cheap filters drop senior and non-IT postings before any model call, a small model scores the fit while code reads the salary (the model invented it), cards wait in an inbox for approval, and a digest e-mail goes out in the morning.
- React 19 + Vite + Tailwind v4, REST API in Hono as a Cloudflare Pages Function, data in Cloudflare D1; TypeScript with shared types, one deploy for the site and the API.

Subscription Tracker (2026)

github.com/ErikKarasek/subscription-tracker | More about it: erikkarasek.cz/subscriptions

- Subscription overview: spend by category, what was actually paid over time, and a watch on upcoming payments and unused services.
- A Cloudflare Worker with static assets serves the site and a Hono API, and a daily cron trigger rolls payments forward and sends email through Resend.
- Data in Cloudflare D1; payment screenshots imported through a vision model on Cloudflare Workers AI, currencies converted at ECB rates.

Skills

- **AI:** My own AI agents and assistants on Cloudflare Workers AI (tool calling, prompt engineering); Claude and Gemini CLI while developing.
- **Programming:** Node.js, Python, Java, React; web scraping, JSON/REST APIs, data structures.
- **Cloud & web:** Cloudflare Workers, REST API integrations, client-side apps.
- **Software testing:** Test cases, test scenarios, DEV environments, Jira.
- **IT support:** L1 helpdesk, ticketing (JIRA), incident escalation.
- **Systems:** Windows 10/11, Active Directory basics, RDP, TeamViewer, LAN/Wi-Fi troubleshooting.
- **Hardware:** Fault diagnosis, component replacement, workstation inventory.
- **3D graphics:** Blender: modelling, texturing, basic animation.

Key technologies

React, Node.js, JavaScript, Python, Java, REST/JSON API, Cloudflare Workers, Supabase, Jira, Git, AI tools

Education

Information Technology and Economics (school-leaving exam)

T. G. Masaryk Business Academy, Kostelec nad Orlicí, 2021 – 2025

Primary school

Týniště nad Orlicí, 2011 – 2020

Languages & more

- **English:** B2, Cambridge English First (FCE)
- **Driving licence:** category B
- **Interests:** PC hardware and builds, AI and new tech, fitness, fashion and style

Strengths

- **Fast learner, self-driven:** I find my way around new technologies and processes quickly.
- **AI-first:** I use AI every day to build faster and better.
- **Reliable, detail-minded:** I see things through to the end.
- **Love to build:** in my free time I take my own projects from idea to deployment.
